### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The claimed subject matter in claims 1-3 is allowable because the arts of record fail to teach or fairly suggest the claimed "an adaptive equalizer comprising: a transmission path situation decision section (106) that decides the situation of the transmission path from the information indicating the previous reception performance and generates respective control signals indicating whether or not to cause said correlation window size control section (105) to change the correlation window size, which output should be selected by said selection section and whether or not to cause said matrix calculation section to carry out a calculation operation; and in combination with the claimed first correlation section (101), a second correlation section (102), a matrix calculation section (103), selection section (104) and correlation window size control section (105), as in claim 1."

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

3. The information disclosure statement filed December 11, 2006 has been considered in-part because the Chinese document numbers 1351454 and 1404675 fail to comply with 37 CFR 1.98(a)(3) because they do not include a concise explanation of

the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, **of each patent listed that is not in the English language**. It has been placed in the application file, but the information referred to therein has not been considered. Attached with this correspondence is the IDS considered in part by the Examiner.

4. As to the Information Disclosure Statement received on July 1, 2004 it has been considered in full and attached with this correspondence is the initialed IDS.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. European patent application number EP 1-465-378 issued to Yui, Tomohiro et al. discloses a correlation selection section for selecting the correlation output from a plurality of correlator according to reception performance.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
